
European Research Council (ERC)

Under the ERC, grants are awarded from the European Union budget, which have **various rules on dissemination of project results** and open access. The conditions can be checked in the [list of grants and their open access rules](#) . In general, open access is mandatory for those grants that have the Article 29 in the contract or tender documents (DISSEMINATION OF RESULTS - OPEN ACCESS - VISIBILITY OF EU FUNDING). It also addresses access to research data. In cases when open access is not mandatory, the **ERC strongly recommends it**.

The ERC has issued [guidelines on implementation of open access](#) , as well as the [Open Research Data and Data Management Plans](#) document, which is intended to help grant recipients manage research data.

General information on ERC grants can be found on the website of the [European Centre of Charles University](#) .
